escalino

The convenient stair climber

Be it a handicap or an illness, stairs restrict your personal mobility considerably. With the escalino you can enjoy the feeling of being capable to reach virtually any destination.

Escalino is the convenient stair climber for every-day life. Inside or outside, at home or en route, the escalino's patented climbing cinematics overcome easily and safely stairs of all kinds providing you with more mobility and a higher quality of life.

Thanks to the escalino's safe climbing qualities the operator is always in control.

Advantages that convince

- Automatic braking function when going downstairs
- Also applicable as a push wheelchair
- No damage to stairs

Universally applicable — escalino climbs stairs of all kinds

The escalino's unique climbing system is reliable on the most diverse surfaces such as wood, stone, metal, PVC or carpet because it features climbers instead of climbing wheels.

The operator needs almost no physical power because the strong electric motor takes over the climbing of the stairs. The safety brakes automatically stop at each edge of a step. Thanks to the handles adjustable in height, the escalino is safely in your hand and easy to handle.

The device is suitable for the transportation of persons up to 120 kg. On average one battery charge is sufficient for approximately 30 levels.

This innovative climbing aid overcomes stairs practically all by itself. The climbers provide steady and secure footing and do not damage the edges of steps. At a standstill and slightly extended climbers the device's seat is lifted so you can easily get on or off it. Thanks to its big wheels and climbers the escalino can also be used on grating stairs.

If necessary, the footrest can be folded up.

The escalino also masters winding stairs safely and comfortably.

The escalino's control unit is clearly structured.

Easy to operate — the escalino provides high technology for everyday life

Handling the escalino is particularly easy. When we developed the device we concentrated, among other things, on compact measurements and easy handling. To operate the escalino you merely need the on/ off switch and the up/down switch. The escalino is equipped with a locking system to avoid unauthorized application.

A further advantage are the removable arm rests, which make getting on the chair and leaving it very easy and comfortable. The seat can be made wider or narrower by exchanging the curved arm rests from right to left and vice versa. Thanks to the detachable back rest and C-part the escalino fits into virtually any boot.

You can rely on our technology

— stay mobile with escalino

- Climbers instead of climbing wheels for secure footing
- Automatic braking function when going downstairs
- Applicable on almost all types of floor coverings
- No damage of the stairs

- Can also be used as a push wheelchair
- Single step mode
- Adjustable handles
- Detachable back rest

Scope of delivery

Even in its basic version the escalino is ready to go. The delivery package includes the stair climber plus charger. For your special needs, individual adjustments or simply for more comfort, you may extend your escalino with optional accessories.

CLIMB

Stair climbers by AAT

The stair climbers by AAT concide with the guidelines of the European Union 2006/42/EG, 2007/47/EG and 93/42/EG.

The company AAT Alber Antriebstechnik is a member of the QVH and has been awarded the quality stamp according to the inspection of quality standards for medical vehicles. AAT is certified according to DIN EN ISO 9001:2008 and EN ISO 13485:2003 + AC:2007.
